SUMMARY

- **Pursuing an M.Sc. in Data Science** with a robust foundation in machine learning architectures, statistical modeling, and data preprocessing.
- Experienced in building automated data cleaning pipelines and developing highly accurate predictive classifiers using python.
- Proficient in utilizing Scikit-learn, XGBoost, and relational databases (SQL) to extract actionable trends from complex datasets.
- Proven capability in transforming raw datasets into structured business intelligence through clear data visualization workflows.

EDUCATION

M.Sc.in Data Science

JAIN Deemed-to-be University, Bengaluru

2026 – 2028(Expected)
Bengaluru,India

- **Focus:** Advanced Machine Learning, Artificial Intelligence and Statistical Modeling

B.Sc. in Data Science

Aadhya Degree College for Women (Affiliated with Osmania University)

2022 – 2025
Hyderabad

Completed with a foundational focus on Data Analytics and Database Management

EXPERIENCE

Data Scientist Intern | AI Variant (ExcelR)

02/2026 – 07/2026
Bengaluru, India

- **Executed exploratory data analysis(EDA)** and data preprocessing pipelines using Python, Pandas, and NumPy to prepare complex real-world datasets for predictive modeling.
- **Developed and evaluated predictive machine learning models** utilizing scikit-learn, optimizing hyperparameter tuning workflows to track and improve performance metrics.
- **Collaborated on end-to-end data pipelines**, delivering actionable visualizations and data-driven insights to enhance practical analytics reporting.

PROJECTS

[GitHub: https://github.com/Rayalasirisha/bike_rental_demand](https://github.com/Rayalasirisha/bike_rental_demand) 🔗

06/2026 – 07/2026

Machine learning/Demand Forecasting

- **Analyzed:** bike-sharing rental data to identify demand patterns and influencing factors.
- **Performed:** data cleaning and exploratory data analysis to prepare the dataset for modeling.
- **Developed:** machine learning models to predict bike rental demand.
- **Implemented:** feature engineering and hyperparameter tuning to improve model performance.
- **Evaluated:** multiple regression models using appropriate performance metrics.
- **Identified:** XGBoost as the best performing model among the evaluated approaches.

[Alzheimer's Disease EDA & Predictive Classification](#) 🔗

06/2026 – 08/2026

Data Science & Machine Learning Project

- Conducted comprehensive Exploratory Data Analysis(EDA) on clinical records to uncover key demographic patterns, correlations, and risk factors.
- Built an end-to-end data preprocessing pipeline using Pandas and NumPy to handle missing clinical values, remove noise, and scale continuous metrics.
- Implemented advanced data visualization configurations utilizing Seaborn and Matplotlib to map multi-class feature distributions and statistical anomalies.
- Designed and evaluated multi-class classification workflows with Scikit-learn, tracking accuracy, confusion matrices, and precision-recall scoring.

SKILLS

Languages & Querying

Python, SQL

Deep Learning & GenAI:

CNNs, TensorFlow, Keras, Generative AI Fundamentals, LLMs , LangChain

Libraries & Frameworks:

Pandas, NumPy, Scikit-learn,XGBoost, Matplotlib, Seaborn, Tableau

Tools & Platforms:

Git, GitHub, Jupyter Notebook, Google Colab, VS Code
